# The Color Code

This page shows the color for each pitch. As preparation, before playing the scores in this book, you can mark your piano keyboard with the appropriate colors. To mark the keyboard, cut out the color bars from the bottom of this page and put them onto the keyboard, as illustrated in the figure below. Cut out half the length of the bars printed below, as shown by the white line. Thus, you have enough bars for two keyboards. We suggest to use transparent sticky tape (not included in this book) to fix the colored bars onto the keys.
